# WELCOME IN OMEGA CONSULTING GROUP

Globalization, law changes and technological innovation require a continuous change on different sides: it is often necessary to look outside the company for a suitable support to compensate lack of time, resources or competences.

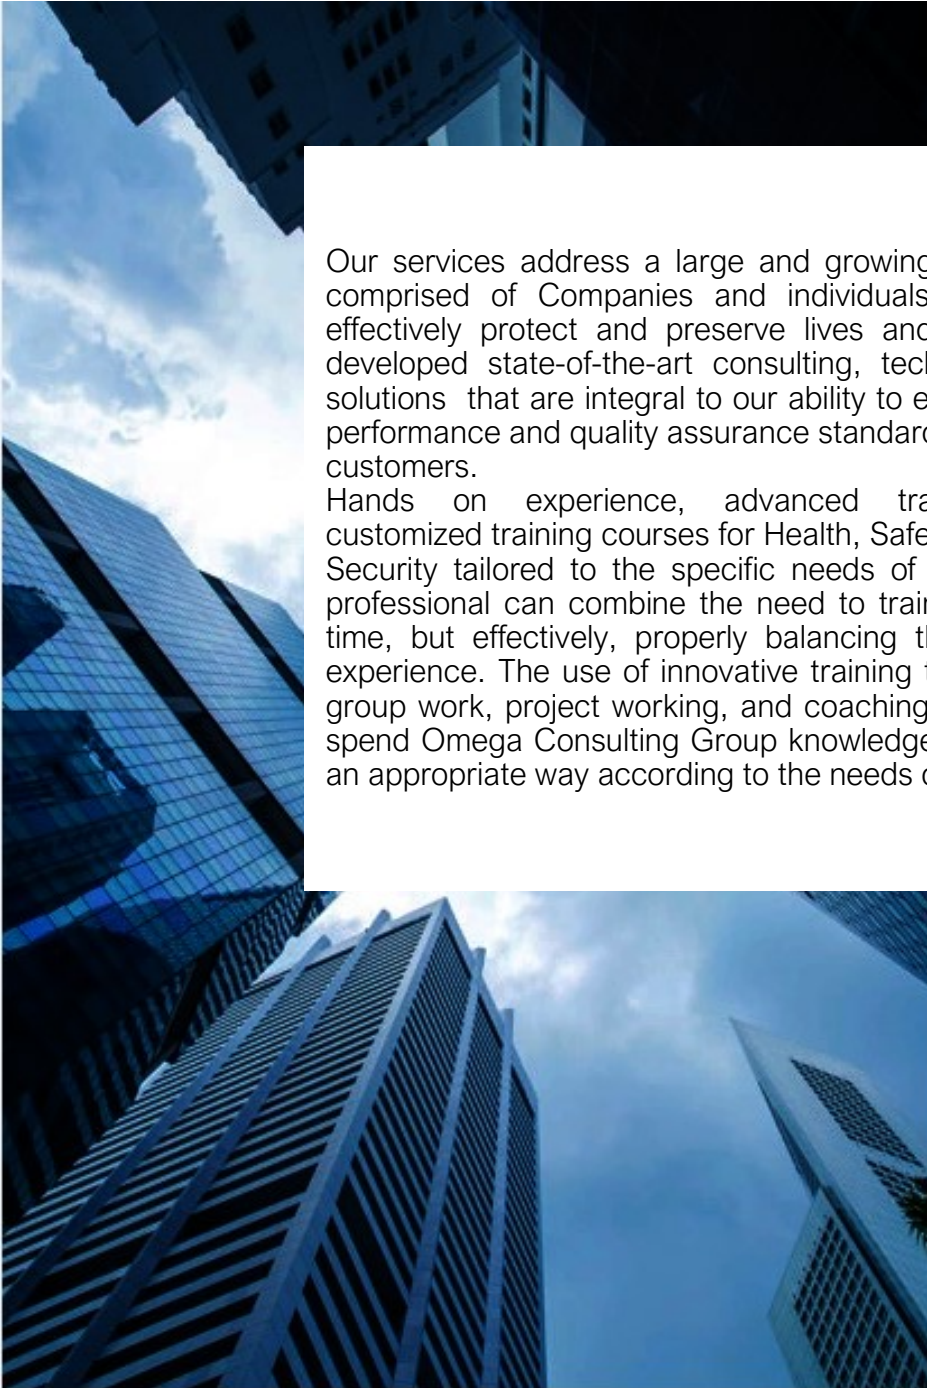

Omega Consulting Group was founded in 2012 as a consulting company in the field of safety and security on workplace and environment capable of responding and supporting the needs of large and small Companies in adapting to the Standard. Leader in its region, the company also operates on national and international projects. .

## Omega Consulting Group

addresses its services to the entire production segment, from small-medium enterprises to large industry, an extremely varied but important area that must face new challenges and new market paradigms every day.

All Companies need to concretely trace the way to ensure the future of their business, protecting human resources and assets.

**A new approach to risk management**

Our services address a large and growing worldwide market comprised of Companies and individuals seeking to more effectively protect and preserve lives and assets. We have developed state-of-the-art consulting, technical and training solutions that are integral to our ability to exceed the stringent performance and quality assurance standards mandated by our customers.

Hands on experience, advanced training techniques, customized training courses for Health, Safety Environment and Security tailored to the specific needs of the customer. Our professional can combine the need to train people in a short time, but effectively, properly balancing theory and on field experience. The use of innovative training techniques such as group work, project working, and coaching allows teachers to spend Omega Consulting Group knowledge and information in an appropriate way according to the needs of the target.

Our Mission is assist our customers in achievement of their goals, allowing them adequate management of risk, supporting them through a wide range range of customized services and solutions on measure. We serve our customers through selected strategic partnerships from our international network: we have developed our operational structure based on 3 pillars, namely **reliability, responsibility and safety**.

We focus the trust of our Partners and Clients on their business continuity, structuring operational solutions aimed at ensuring the minimum impact on human resources, structures and corporate know-how, thus protecting investors and shareholders .

**Safety uas control of work flows through dedicated approaches, as a guarantee of operational continuity and asset protection.**

## OUR TEAM

Our team is selected for its complimentary and broad range of response skills consisting of sector health, safety and security, operations management, emergency management, medical support and trainings. We are structured to provide a comprehensive suite of health, safety and security services, including operations management and risk management services to our clients in all environments. Cultural awareness with a deep understanding of local nuance, and political and economic context are just some of the keys we use to ensure effective and safe overseas operations.

## SECURITY

The strategic approach that distinguishes our modus operandi is developed in the planning of measures suitable to mitigate the risk, security management models and security protocols suitable for the management of crises and emergencies also at an international level.

## RISK MANAGEMENT

Ensuring the safety of personnel, planning prevention and protection measures or managing any emergencies is a strategic priority for Company Management: our support is aimed to prevent and reduce corporate vulnerabilities, to avoid serious losses. .

## ACADEMY

The training aspect is essential and has strategic importance before starting any risky activity. We provide tailor-made training programs, developed according to concrete solutions tailored to the needs of our Customers.

## HSE

People are the most important business asset: it is obvious that the duty to protect them does not arise only on grounds of moral ethical, but also on grounds related to the business and not least for legal responsibility of the company.

# SERVICES

## CONSULTING

Our team of experienced professionals have the know-how and capability to effectively identify, evaluate and implement risk management measures covering a wide range of industries and their sectors.

## PRIVACY

Data protection through a proactive and risk-based treatment system that guarantees, in addition to confidentiality, also the availability and integration of the same in a flexible way, adaptable to changing needs and technological tools.

## TRAVEL SECURITY

Identify, predict, have a constantly updated risk map to be able to take the necessary precautions: we develop and help Companies to adopt specific Travel Security Policies concerning the protection of the health and safety of traveling workers.

## OCCUPATIONAL MEDICINE

Accidents and occupational diseases are a social problem to be fought and a huge cost for companies, which is why we use occupational doctors with proven decades of experience to develop accurate health surveillance programs.

## ACADEMY & TRAININGS

The training aspect is essential and has strategic importance before starting any risky activity. We work together with our Partners - Customers to better manage the risks deriving from their activity, providing tailor-made training projects, developed according to concrete solutions and commensurate with their needs: for us nothing can be "standardized".

Ensuring the safety of company personnel, planning prevention and protection measures or managing any emergencies is a strategic priority for Company Management. These objectives cannot be achieved without adequate training of human resources, the basis on which the success of a company is founded.

Courses are available for:

- \* Health and Safety & Security (industrial, construction sites);
- \* Emergency Unit (Company Crisis Unit, First Aid and Fire team);
- \* Food safety (for food industrial and agriculture);
- \* Internationalization , Travel Security e antiskidnapping (Security for Top Managers, senior executives, workers and Travel Manager);
- \* Counter terrorism for operational and security personnel within sensitive and civilian targets

Safety at the workplace is a must: prevent risks and damage through specialized consulting and supervision. Accidents and professional disease are a social problem to fight and a huge cost for companies.

**Our services are:**

Legislative updates;

Deadline management;

Continuous support;

Technical expertise for machinery/equipment;

## FAILURE IS NOT AN OPTION

Demonstrating that your productive activity respects the rights of individuals, as men or as workers, by investing in human resources and therefore in the future, becomes an element of competitive advantage in increasingly ethically mature markets.

Corporate social responsibility, to date, is indeed an issue on which we are building new economic dynamics affecting the competition, both on a global scale, both on a local scale.
